

Sorting

Sort4Circle®

precise sorting into definable fractions

PLASTIC WASTE BECOMES A RESOURCE.

Would you finally like to precisely sort plastic materials into all useful fractions and bring your recycling rate to a new dimension?

Sort4Circle® first singulates, then completely identifies and finally sorts all material specifications in one step, just like letter sorting.

Unique properties of the technology:

- + Cost-efficient even with many sorting fractions
- + Technology-open due to the use of all relevant detection technologies for every item
- + Expandable with fluorescent markers as option to define fractions and achieve purities > 99%
- + Sustainable because of low energy needs & very large CO₂-reduction in the plastic value chain
